No Connection	P 13	No Connection
Ground	R 14	Ground
Ground	S 15	Ground
Ground	T 16	Ground
Ground	U 17	Ground
No Connection	V 18	B+W Video Signal

NOTES:

1. The +18v DC power supply runs OK on +12v.
2. The Power-On-Reset (Daughterboard pin 9) must be tied to earth or the game will not run!
This may result in the game making noises and a blank/garbage screen for up to 10 seconds.
A better way is to simulate the POR using the circuit shown to the right:
